Class X   - (CBSE)   percentage - 79.44 %

PROJECTS

- **Made a PAW SHELTER WEBSITE**

  This project is about a responsive website that takes care of Dogs , This website has a very clean user interface that has contents like to connect with a Doctor or other useful stuff . we make this website with help of HTML , CSS and JAVASCRIPT.

  Link to project : **https://bhaskarkulshrestha.github.io/Paw-Shelter-website/**

- **Weather Predicting Website using HTML CSS and JAVASCRIPT and API**

  This project is about a weather predicting website that can predict the weather for the given location with the help of API . By HTML and CSS I have made the interface of the website and using Javascript I have linked the website and openweather.com which provide the live location weather.
